

Extreme Events – Supporting Materials

[Nematrian website page: [ExtremeEventsSupportingMaterials](#), © Nematrian 2015]

The Nematrian website contains a wide range of supporting materials for Malcolm Kemp's book on [Extreme Events](#), as it does for Malcolm's earlier book on [Market Consistency](#). This supporting material includes:

- (a) [Charts sourced from Nematrian](#) included in the book
- (b) [Specimen Questions and Answers](#), covered in book's Appendix
- (c) [Errata](#)
- (d) Topic Material, including material on:
 - [Stable distributions](#)
 - [Independent Components Analysis and Principal Components Analysis](#)
 - [Portfolio optimisation](#) and related [web service functions](#)
 - [Portfolio backtesting](#)

Topic material including material not specifically listed above can also be found using the Nematrian website's extensive [search](#) capabilities.

A complete list of material (where present) on the Nematrian website referred to in the main body of [Extreme Events](#) is available [here](#).
